# 公司简介

在中国第一个生态环境市，长江中下游第二大岛-----江苏省扬中市境内有一家集输配电成套、电力电气、太阳能组件等产品研发、制造、销售、服务于一体的国家级高新技术企业，这就是-----江苏士林电气集团有限公司。

公司通过了ABS体系认证、ISO9001质量管理体系认证、ISO14001环境管理体系认证、ISO45001职业健康安全管理体系认证和“CQC”产品认证，全部产品均通过了国家或行业最新标准检测。公司被评为国家级专精特新“小巨人”企业、“质量信用AAA级”、“重合同守信用企业”及省市“AAA”资信企业。拥有九十余项自主知识产权，多项产品获得省和国家高新技术产品称号，自主研发的管型母线获省、市科技进奖，江苏省专精特新产品。

江苏士林电气集团有限公司与德国赛通电气、ABB电气、施耐德电气（中国）有限公司等企业强强联合，在国内外市场上共同生产和合作经营各类电气产品。长期以来，公司以“科技是第一生产力为指导思想，以不断创新的理念，精益求精的态度，现代化的管理手段，为广大用户专业化制造：高低压配电柜、高压绝缘管母线、风电专用管母线、照明母线、密集型母线槽、IP68防水、浇注、防腐母线槽、耐火电缆桥架、一次滚压成型环形筋节能高强电缆桥架、支架等系列产品。特别是公司生产的绝缘管母线、浇注防水母线是国内生产规模较大，产品系列齐全且专利技术在国内外处于领先地位的高新技术产品，在工控、供配电等领域享有较高的知名度和市场占有率。

公司先进的创新技术和卓越的品质，成就了“士林品牌”，遍布全国各大城市的营销服务网络，确保了“士林产品”和“士林服务”在行业中的排头兵地位；士林的产品被广泛应用于国内举世瞩目的大型项目——南京青奥会、田湾核电站.....士林的用户遍布：高铁、地铁、高速公路、发电系统、造船汽车、工矿、石油化工和政府工程等各项领域，并获得了一致好评！

“士林电气”始终秉承“专业、品质、共赢”的企业理念，汇集国内外精英才俊，走自主创新发展之路，实现士林电气工程技术和专业化服务技术的双提升，达到士林产品从“士林制造”到“士林创造”的新发展，在中国电气产业中，展示自己的综合实力和高端水平。

公司热烈欢迎与各大设计院所、广大用户和关心支持士林发展的社会精英真诚合作，携手致力于我国电气事业的发展和繁荣。

## Company Profile

In the first ecological environment city in China, within the boundaries of Yangzhong City, Jiangsu Province, the second largest island in the middle and lower reaches of the Yangtze River, there is a national-level high-tech enterprise known as Jiangsu Shilin Electric Group Co., Ltd. This company specializes in the research and development, manufacturing, sales, and service of a complete set of power transmission and distribution equipment, power electrical products, solar modules, and other products.

The company has passed the ABS system certification, ISO9001 quality management system certification, ISO14001 environmental management system certification, ISO45001 occupational health and safety management system certification, and “CQC” product certification. All products have passed the latest national or industrial standard testing. The company has been recognized as a national-level specialized and innovative “Little Giant” enterprise, “Quality Credit AAA Grade” enterprise, “Contract-abiding and Trustworthy” enterprise, as well as a provincial and municipal “AAA” credit enterprise. With more than ninety independent intellectual property rights, multiple products have been awarded the title of provincial and national high-tech products, and the independently developed pipe-type busbar has won provincial and municipal scientific and technological progress awards, making it a specialized and innovative product in Jiangsu Province.

Jiangsu Shilin Electric Group Co., Ltd. has formed a strong alliance with enterprises, such as Germany System Electric, ABB Electric, and Schneider Electric (China) Ltd., engaging in joint production and cooperative operations of various electrical products in domestic and international markets. Upholding the guide thought that “science and technology constitute the primary productive force”, the company keeps making innovations, keeps improving, and uses a modernized management means to provide professional manufacturing for plenty of users. A series of products including high and low voltage distribution cabinets, high voltage insulated busbars, wind power dedicated busbars, lighting busbars, compact busways, IP68 waterproof and cast-in-place corrosion-resistant busways, fire-resistant cable trays, energy-efficient high-strength cable trays with once-rolled circular ribs, and supports. Particularly, insulated busbars and waterproof cast-in-place busbars are high-tech products with the larger production scale in China, complete product series, and cutting-edge patent technology, enjoying the higher popularity and market occupancy in the fields of engineering control, power supply and distribution.

Upholding the advanced innovative technology and excellent quality, the company creates “Shilin Brand”, spreading all over marketing service networks in various cities of China and ensuring the pacesetter position of “Shilin products” and “Shilin services” in the industry. Shilin products have been widely applied in prominent domestic mega-projects, such as the Nanjing Youth Olympic Games and the Tianwan Nuclear Power Plant. Shilin’s users span various sectors, including high-speed rails, subways, highways, power generation systems, shipbuilding, automobiles, industrial and mining sectors, petrochemicals, government projects, etc., earning unanimous praise!

“Shilin Electric” always upholds the professional ideas of “profession, high-quality, and win-win result”. Gathering elites at home and abroad and insisting on the independent and innovative development, the company realizes the double improvement on Shilin electrical engineering technology and professional service technology to realize new development of Shilin products from “Made in Shilin” and “Created in Shilin”. In the Chinese electrical industry, the company fully performs its comprehensive strength and high-end level.

The company warmly welcomes sincere cooperation with major design institutes, extensive users, and socially elite individuals who care about and support Shilin’s development, devoting to realizing the development and prosperity of China’s electrical industry.

## 产品特点 Product Features

### ★ 载流量大

绝缘管型母线为空心导体，集肤效应系数小，导体表面电流密度分布均匀，载流量大。

### ★ 电气绝缘性强，安全可靠

绝缘管型母线采用了具有优良电气性能的三元乙两橡胶材料为绝缘，生产工艺采用导体屏蔽层、绝缘层、绝缘屏蔽层三层共挤的方式。避免了单层或二层挤出工艺造成的绝缘与屏蔽层之间接触不紧密及层与层之间存在气泡等缺陷。

外壳接地电位为零，母线表面电场分布均匀，电气绝缘性能强。可以直接通过电缆沟和电缆夹层。

### ★ 母线终端及中间连接实现了全预制

母线与变压器连接采用预制终端。母线与气体开关柜采用插拔式预制终端绝缘连接。母线中间接头采用预制橡胶件绝缘连接。

### ★ 所用绝缘材料适用温度范围大

采用的绝缘材料为三元乙丙橡胶，导体允许长期工作温度 90°C，短路 250°C。

采用的三元乙丙橡胶绝缘料有优良的电气性能及化学稳定性能，优良的耐热老化性能。

### ★ 抗震性强

由于绝缘管母线可直接固定在钢结构或凝土支架上，取消穿墙套管和支柱绝缘子，具有较强抗震能力。

### ★ 允许应力大，机械强度高

允许应力为矩形母线的 4 倍，可承受的短路电流大机械强度高，使得母线支撑跨距增大。

### ★ 散热条件好，温升低

母线内径风道能自然形成空气对流，散热除湿除尘条件好。

### ★ 不受环境干扰，安全可靠

本产品绝缘屏蔽密封，内部无凝露产生，并消除了外界潮气、灰尘及外物所引起的接地和相间短路故障，运行安全可靠。

★ 构件简明、美观，安装方便，使用寿命长，维护量少。

### ★ Large current-carrying capacity

The conductor of insulating tubular busbar is hollow, low skin effect coefficient. Current density distribution of conductor surface is homogenous and the current-carrying capacity is large.

### ★ Strong electric insulation, safe and reliable

The insulating material of insulating tubular busbar is EPDM with excellent electric performance. The production process introduces the mode of three-layer co-extrusion: conductor shielding layer, insulation layer and insulation shielding layer. The defects caused by single-layer or two-layer extrusion process, e.g. untight contact between insulation layer and shielding layer and bubble have been avoided.

The housing ground potential is 0; the distribution of electric field of busbar surface is homogenous, the electric insulation performance is strong. It can pass the cable trench and cable interlayer directly.

### ★ Realized prefabrication of busbar terminal and middle connection

Prefabricated terminal is used for connecting busbar and transformer. Pluggable prefabricated terminal is used for insulating connection between the busbar and gas switch cabinet. Prefabricated rubber insulating connector is used for connection of busbars.

### ★ Wide applicable temperature range of used insulating material

The adopted insulating material is EPDM. The allowable long time working temperature of conductor is 90°C and 250°C for short circuit. EPDM has excellent electric performance and stable chemical performance and good thermal aging resistance.

### ★ Strong resistance to shock

Because the insulating tubular busbar can be fixed to the steel structure or concrete support, the wall bushing and supporting insulator are cancelled, having strong resistance to shock.

### ★ High allowable stress and mechanical strength

The allowable stress is 4 times of rectangle busbar and large withstanding short circuit current and strong mechanical strength makes the support span increase.

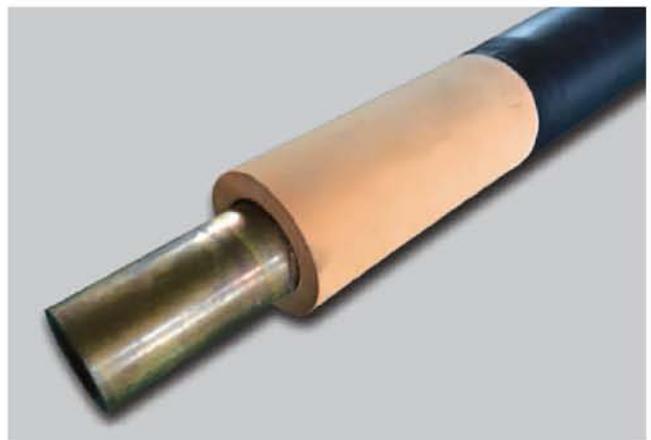

### ★ Good heat dissipation and low temperature rise

The air channel of busbar can form cross-ventilation, good for heat dissipation, dehumidification and de-dusting.

### ★ Free from the environmental disturbance, safe and reliable

The product is enclosed, insulated and shielded. No condensation inside and getting rid of outside humidity, dust, ground and interphase short circuit fault caused by foreign matters, safe and reliable operation.

★ Simple structure, nice appearance and easy installation, long lifetime and little maintenance work.

## 运行环境条件 Running Environment and Conditions

### ★ 适应安装环境和场所：

- 架空、电缆层和电缆沟
- 户外、户内安装

### ★ 使用条件

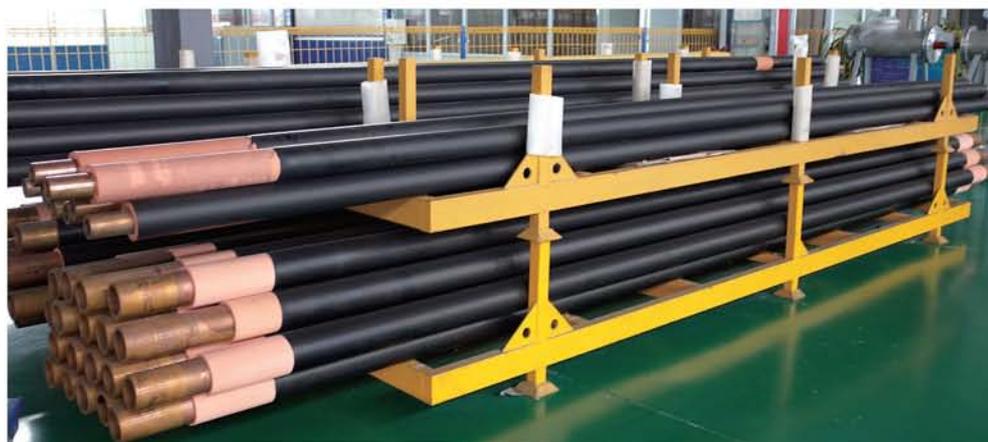

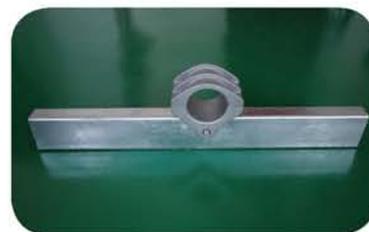

- 海拔高度：≤ 1000m (海拔高于 1000m 时，需由生产厂家做特殊生产)
- 最大风速：35m/s
- 环境相对湿度 (在 25°C 时)：日平均值：95%，月平均值：90%
- 最大日温差：30°C
- 地震烈度：VII 级
- 水平加速度：0.25g
- 垂直加速度：0.125g
- 频率：震动频率 20Hz
- 耐受时间：为正弦波 3 周波
- 污秽等级：IV 级 (31mm/kV，按最高电压计算)

### ★ Applicable installation environment and places

- Overhead, cable layer and cable trench
- Outdoor, indoor installation

### ★ Service conditons

- Altitude: ≤1000m (if the altitude is higher than 1000m, the maker has to produce specially)
- Max wind velocity: 35m/s
- Relative humidity (25°C): daily average value: 95%; monthly average value: 90%
- Max daily temperature difference: 30°C
- Seismic intensity: VII
- Horizontal acceleration: 0.25g
- Vertical acceleration: 0.125g
- Frequency: vibration frequency 20Hz
- Duration: 3 cycles of sine wave
- Pollution grade: IV (31mm/kV, calculated as highest voltage)

## 新产品新技术鉴定验收证书

Acceptance Certificate for Appraisal of New Product and New Technology

### 新产品新技术鉴定验收证书

苏经信鉴字[2016] 078 号

产品（技术）名称： 10kV 6300A 三层共挤乙丙橡胶绝缘  
复合屏蔽封闭管型母线系统

完成单位：江苏士林电气设备有限公司

鉴定类别：新产品

鉴定形式：会议鉴定

鉴定主持单位：镇江市经济和信息化委员会

鉴定组织单位：江苏省经济和信息化委员会

鉴定日期：2016 年 5 月 7 日

## 新产品新技术鉴定验收证书

### Acceptance Certificate for Appraisal of New Product and New Technology

#### 鉴 定 意 见

受江苏省经信委委托，镇江市经信委于2016年5月7日在扬中市主持召开了江苏士林电气设备有限公司“10kV/6300A 三层共挤乙丙橡胶绝缘复合屏蔽封闭管型母线”新产品鉴定会。鉴定委员会听取了产品研制、技术总结及用户使用等报告，考察了产品生产现场，审查了技术文件。经质询和讨论，形成鉴定意见如下：

1、提供鉴定的技术文件资料齐全、正确、规范，符合鉴定要求。

2、产品采用乙丙橡胶绝缘和三层共挤生产工艺，有效提高了母线绝缘性能和复杂结构的适应性；采用预制式母线终端，有效减弱了电场畸变，减少了接触电阻，降低了温升；采用预制绝缘母线接头，使母线内部场强均匀，提高了母线接头的绝缘性能。产品无污染，安全可靠，安装使用方便。产品已申请发明专利9件，实用新型专利10件。

3、产品经国家电线电缆质量监督检验中心型式试验检测，各项性能指标符合 Q/321182APW004-2016 标准要求，产品经用户使用，反映良好。

4、公司通过了 ISO9001、ISO14001 质量、环境管理体系认证，生产工装设备和检测设备齐全，具备批量生产的条件。

鉴定委员会一致认为，该产品综合性能指标处于国内同类产品领先水平，一致同意通过新产品鉴定。

主任委员： 

副主任委员： 

2016年5月7日

## 方式一、主变到控制室架空母联

### Way 1 Overhead Buscouple From Main Transformer to Control Room

这是管型绝缘母线应用的最常见的方式，母线从主变的低压端子直接联到控制室的开关柜端子。主要优点：适合大电流，布线清晰美观，可采用全绝缘、半绝缘两种方式。

It is common application of tubular insulating busbar. The busbar is connected from the low voltage terminal of main transformer to the terminal of switch cabinet in the control room. Main advantages: suitable for large current, clear and nice wiring. Both all-insulation type and semi-insulation type can be used.

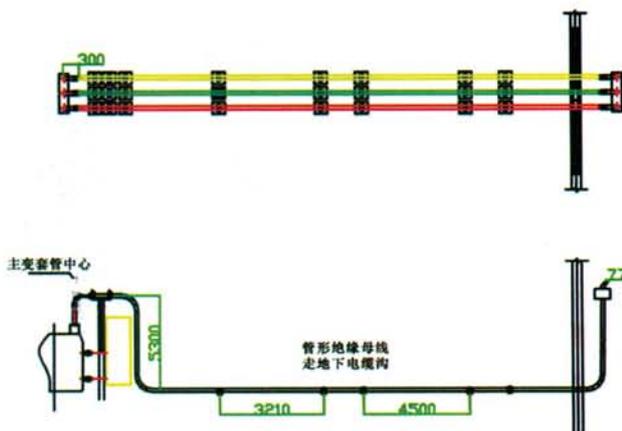

## 方式二、母线走电缆沟或电缆夹层

### Way 2 Busbar Go From Cable Trench or Cable Interlayer

下图是管型绝缘母线应用的另一种常见方式，母线可以经过地下电缆沟或者电缆夹层和开关柜连接，也可用于开关柜之间的连接。该母线采用全绝缘型，特别适合布线困难的场合。

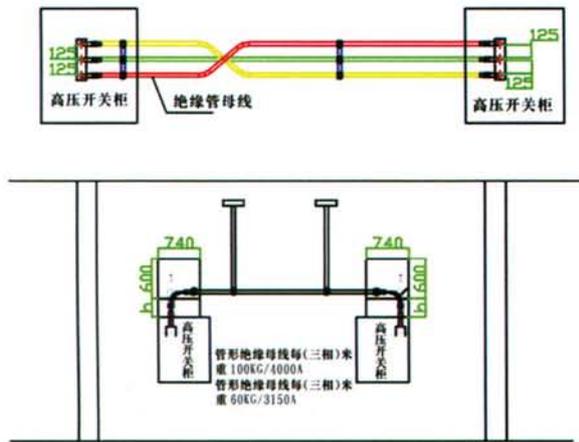

The following picture is another common application of tubular insulating busbar. The busbar can be connected to switch cabinet from the following cable trench or cable interlayer and also can be used for connecting switch cabinet and switch cabinet. The busbar uses all-insulation type. It is suitable for the area where it is very difficult for wiring.

### 方式三、开关柜上母联 Way 3 Buscouple on the Top of Switch Cabinet

该方式为开关柜间顶部上进线连接方式。也可以通过电缆夹层，采用征进线方式。用户可根据实际情况自行选择。母线类型为全绝缘。

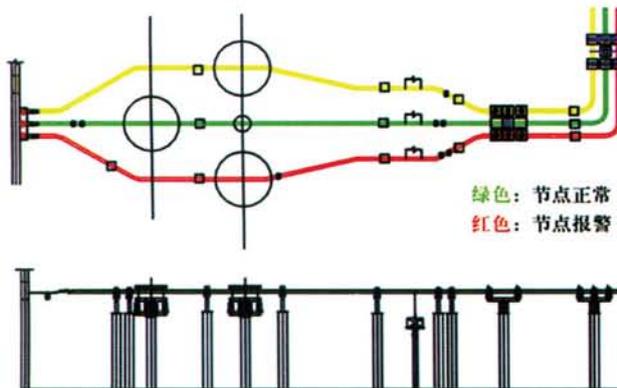

The way is suitable for inletting the wire from the top of switch cabinet. The way also can be used from the cable interlayer. The customer can choose according to actual situation. The type of busbar is all-insulation.

### 方式四、电抗器母联 Way 4 Reactor Buscouple

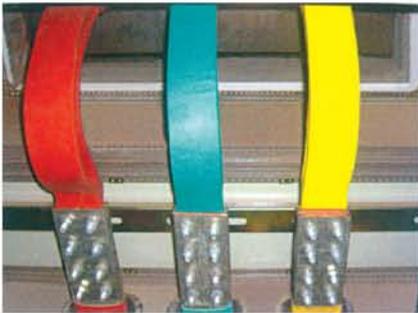

我公司自行研制，对管母线的多项技术数据实行无人智能监控。

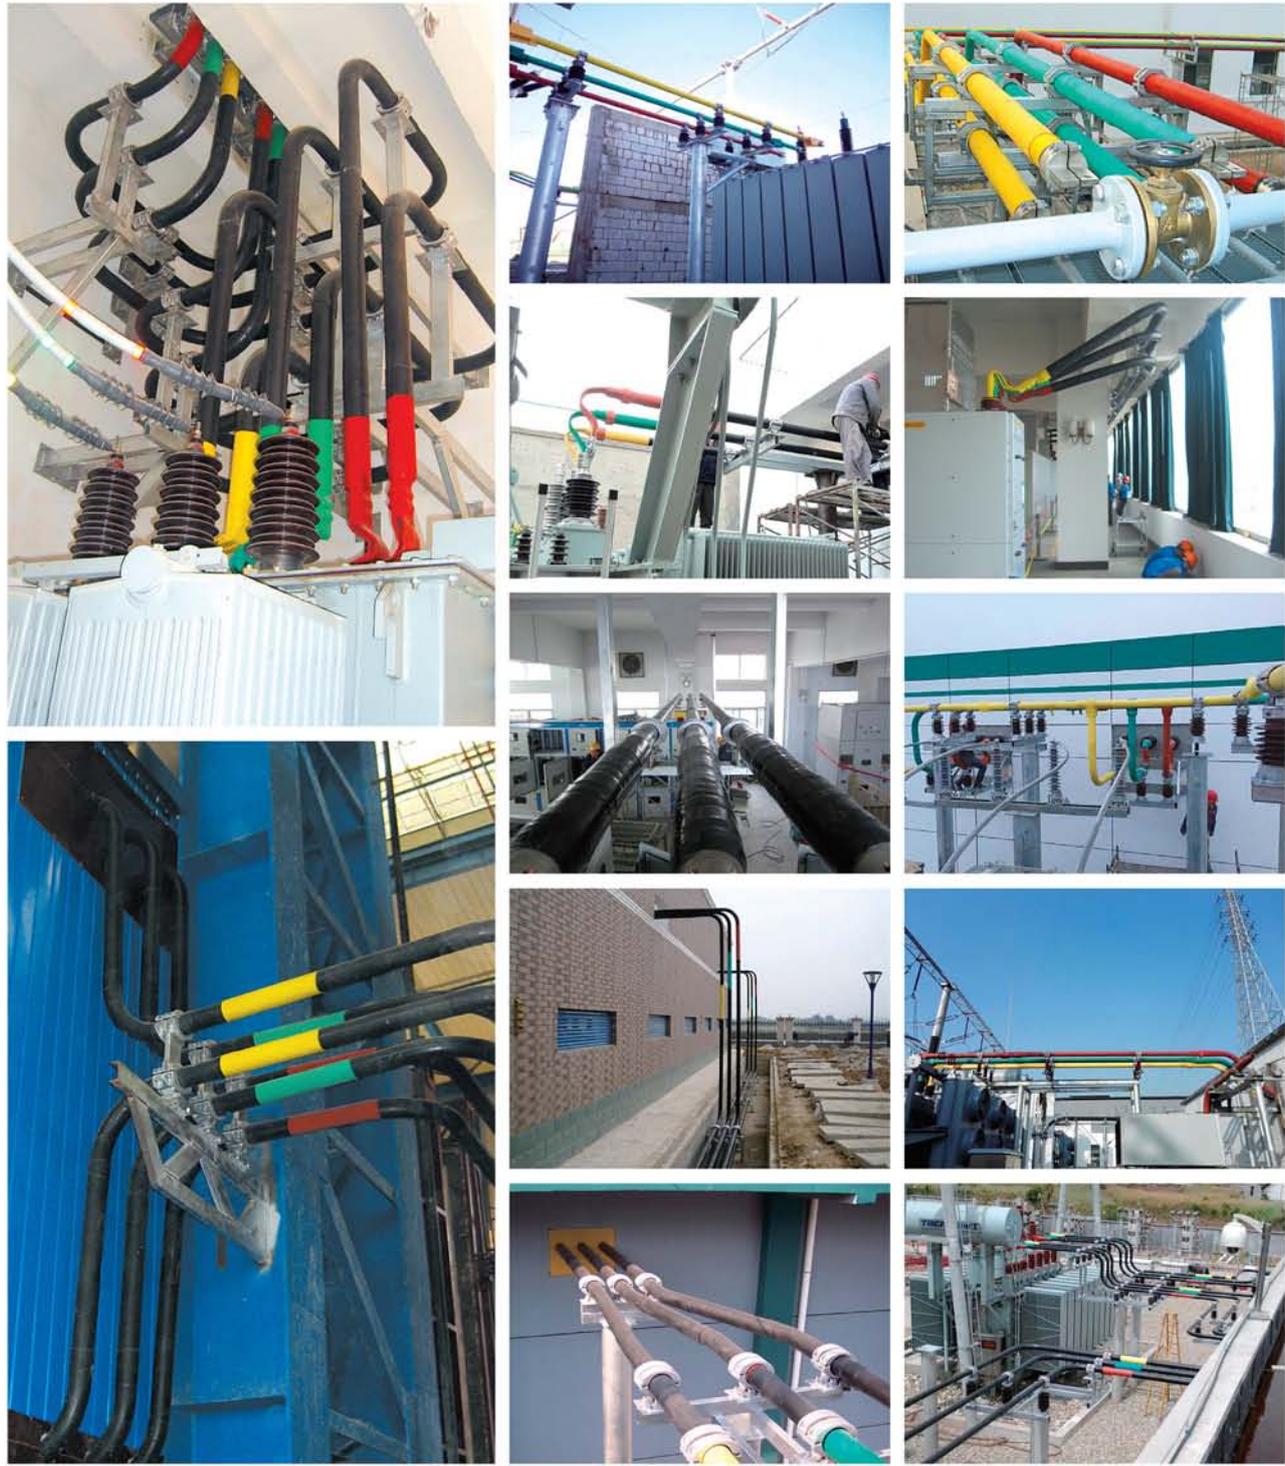

Our company independently develops and implements smart monitoring of many items of technical data for tubular busbar.

## 设计安装 Design and Installation

- 设计：由工程提供母线走线图、总长度及弯头数，厂家按载流量设计与制造。
- 安装：厂家可负责现场安装。
- Design: the layout of busbar, total length and Qty of elbow are provided by the project, the maker will design and manufacture according to the current-carrying capacity.
- Installation: the maker is responsible for site installation.

## 铝合金管型母线执行标准、性能、技术指标及参数

### Standards, Performance, Technical Index and Parameters of Aluminum Alloy Tubular busbar

#### 执行标准 Executive standard

QB/HG102-2000 铝及铝合金管型导体 Aluminium and aluminium alloy tubular conductor

#### 引用标准 Reference standards

GB/T3190-96 变形铝及铝合金化学成分 Chemical composition of wrought aluminium and aluminium alloy

GB/T6893-2000 工业用铝及铝合金拉(轧)制管 Industrial aluminium and aluminium alloy drawn (rolled) pipe

YS/454-2003 铝及铝合金导体 Aluminium and aluminium alloy conductor

#### 适用范围 ERange of application

用于110kV、220kV、500kV发电站、开关站 User for 110kV, 220kV, 500kV power generation station, switching station
